IDENTIFICATION

Investment objective

The Fund's investment objective is to achieve performance equal to or greater than the Exane ECI Europe, minus management fees, over the recommended investment period.

The management of the Fund is completely discretionary.

Benchmark

The benchmark is the Exane ECI Europe index published by Exane. It is composed of convertible bonds. This is a representative indicator of the composition and liquidity of the euro zone convertible bond market. This is weighted by market capitalisation and is calculated with coupons reinvested to take into account the fixed income aspect of the product, and in particular its features in terms of income and capital protection.

It is published daily by Bloomberg under the code EECIEECI Index.

The benchmark is provided by Exane Derivatives. As at the date of the latest update of this Prospectus, the benchmark administrator has not yet been entered in the register of administrators and benchmarks maintained by ESMA. Additional information relating to the benchmark (including its components) are shown on the website of the benchmark administrator at the following address: www.exaneeci.com

Investment strategy

The Fund invests in European convertible bonds with no rating constraint, and in European equities where appropriate, subject to a limit of 30% of the net assets.

After studying the macroeconomic context, a sector analysis is carried out to identify growth sectors. Securities are selected based on technical criteria specific to convertible bonds. These must have sufficient sensitivity to profit from the performance of the underlying equities. Conversely, the protection offered by the fixed income component provides a significant buffer in case of a stock market fall.

The Fund's management process is twofold:

Top-down analysis:

The top-down analysis is designed to establish the overall target exposure of the portfolio relative to the benchmark (underexposure, overexposure, neutral exposure) and an allocation by business sector. To do this, the management team relies on available leading macroeconomic indicators that show which sectors will profit from the cycle.

Bottom-up analysis:

The Fund seeks to optimise performance through dynamic management, which consists of selecting the most attractive securities based on a three-step investment process. The first step is to estimate the implied volatility of the convertible bond so that it can be positioned relative to its universe and the other available implied volatilities (options, etc.). The management team then proceeds with a detailed fundamental analysis of the equity component of the security and its earnings prospects (premium, delta, convexity). Lastly, it studies the fixed income component of the security (rating, yield, call).

Up to 200% of the portfolio's net assets will be exposed through asset positions and off-balance-sheet positions.

The selection of credit instruments is based on an internal credit risk analysis. Lines are not purchased or sold purely based on the rating from rating agencies. After analysis, the fund manager determines the credit rating of the securities when they are bought or sold and while they are held.

The portfolio is invested in:

- **Debt securities, money market instruments**

Up to 100% of the portfolio.

The Fund may invest up to 100% of the entire portfolio in public or private sector bonds and debt securities with a fixed or floating rate coupon, issued by OECD sovereigns. These securities must have a minimum rating of AA- (Standard & Poor's or Fitch) or Aa3 (Moody's) or via an internal rating to the management company.

The Fund may also invest up to 10% of the net assets in negotiable debt securities with a residual maturity of less than three months, from corporate issuers with a minimum rating of A1/P1 or via an internal rating to the management company.

The securities may be denominated in currencies of OECD countries.

The Fund may invest up to 10% of its net assets in bonds issued by an issuer group having a portion of its debt comprising convertible and similar bonds. These bonds will be with a public or private sector fixed or variable coupon from OECD countries, without rating constraint. The method of selection of these securities is part of the same process as that described for convertible bonds (except analysis of the equity component that does not exist in the context of conventional bonds).

The Fund is managed within a sensitivity range of 0 to 10, without any maturity constraint on individual securities.

▪ **Securities with embedded derivatives**

The Fund may invest up to 100% of the portfolio in convertible and similar bonds issued by European and Swiss companies, with no rating constraint on the securities.

The proportion of convertible and similar bonds issued by companies in countries outside Europe and Switzerland may not exceed 20% of the net assets.

▪ **Shares or units of UCITS or investment funds**

Up to 10% of the net assets.

For cash management purposes, the Fund may invest in French and/or European money market UCITS.

▪ **Equities or other capital securities**

The Fund may invest up to 30% of the net assets in equities issued in European countries, regardless of market capitalisation. This limit includes equities in the portfolio resulting from the conversion of convertible bonds.

▪ **Deposits**

To manage its liquidity, the Fund may hold up to 10% of its assets in deposits, as defined by Article R 214-14 of the French Monetary and Financial Code.

▪ **Cash borrowings**

In the normal course of its operation, the UCITS may occasionally find itself in a net debit position and have to borrow cash to a value not exceeding 10% of its assets.

▪ **Temporary purchases and sales of securities**

Nature of transactions used:

- repurchase and reverse repurchase transactions by reference to the French Monetary and Financial Code;
- securities lending and borrowing by reference to the French Monetary and Financial Code;
- other: sell and buy back; buy and sell back.

These transactions will involve all authorised assets except for UCIs.

These assets are kept with the Custodian.

Nature of transactions, all of which must be confined to the attainment of the management objective:

- cash management: by means of reverse repurchase transactions;

- optimisation of the UCITS' revenues;
- possible contribution to leverage of the UCITS, particularly through repurchase transactions.

Level of utilisation envisaged and authorised: up to 100% of net assets.

Remuneration: See paragraph headed Fees and Commissions.

Summary of proportions used

Type of transactions	Reverse repurchase	Repurchase	Securities lending	Securities borrowing
Maximum proportion (of net assets)	50%	50%	50%	0%
Expected proportion (of net assets)	between 0% and 50%	between 0% and 50%	between 0% and 50%	0%

The sum of the exposures arising from physical securities and from commitments in respect of derivatives and temporary purchases and sales of securities is limited to 200% of net assets.

Additional information on collateral (temporary purchases and sales of securities)

Nature of collateral:

In the context of transactions involving the temporary purchase and sales of securities, the UCITS may receive securities and cash by way of guarantee (collateral).

Securities taken as collateral must meet the criteria laid down by the Management Company. They must be:

- liquid,
- saleable at all times,
- diversified, in compliance with the UCITS' rules of eligibility, exposure and diversification,
- issued by an issuer that is not an entity of the counterparty or of its group.

For bonds, the securities must also be issued by issuers located in the OECD and of good quality, with a minimum rating of between AAA and BBB- on the Standard & Poor's scale or with a rating deemed equivalent by the Management Company. Bonds must have a maximum maturity of 50 years.

The above criteria are set forth in the Management Company's risk policy, and are subject to change, particularly in the event of exceptional market circumstances.

Mark-downs may be applied to collateral received; these take account of credit quality, price volatility of the securities and the result of crisis simulations carried out.

Re-use of cash collateral received:

Cash collateral received may be reinvested in deposits, government bonds, reverse repurchase transactions or short-term money market UCITS in accordance with the Management Company's risk policy.

Re-use of securities received as collateral:

Not authorised: Securities received as collateral may not be sold, reinvested or re-used in guarantee.

Temporary purchases and sales of securities are conducted in accordance with the regulations on counterparty risk. No conflict of interest has been identified.

To achieve the investment objective, the Fund may use the following instruments:

▪ **Derivatives**

The fund manager may use financial instruments traded on a regulated market: futures (interest rate and equity index futures), options (options on interest rate and equity index futures).

Futures and options may be used for exposure purposes or to hedge interest rate risk or equities in the portfolio.

Up to 100% of the Fund's net assets may consist of derivatives.

Positions may also be taken to hedge shares denominated in CHF and USD against currency risk using foreign exchange forward contracts.

Risk profile

Your money will be mainly invested in the financial instruments selected by the management company. These instruments will be exposed to market fluctuations.

- **Risk of capital loss:** Investors may not get back the full amount of their initial investment.
- **Discretionary risk:** The management style is discretionary, which means that the fund manager may deviate from the composition of the benchmark according to his or her convictions about issuers or market expectations. There is the risk that the Fund might not be invested at all times in the best performing securities, and that the Fund's performance could deviate significantly from the benchmark.
- **Risk linked to holding convertible bonds:** The value of convertible bonds depends on several factors: interest rates, changes in the price of the underlying equities, changes in the price of the derivative embedded in the convertible bond. The Fund's net asset value could be reduced in light of these various factors.
- **Equity risk:** The value of the underlying equities depends on the intrinsic qualities of the company, which can vary significantly over time. The value of the Fund may go down in the event of a stock market fall and/or a fall in the underlying securities or specific investments held by the Fund.
- **Liquidity risk:** In specific cases where trading volumes in financial markets are very low, any purchase or sale in these markets could trigger significant market fluctuations, particularly for convertible bonds with a low nominal amount or small or mid-cap stocks.
- **Interest rate risk:** Since the portfolio is mainly invested in fixed income securities, investors are exposed to interest rate risk. This is the risk of a fall in the value of fixed income securities due to interest rate fluctuations. It is measured by interest rate sensitivity. If interest rates rise, the net asset value of the Fund could fall significantly.
- **Credit risk:** This is the risk of an issuer's credit rating being downgraded, causing the value of the securities it has issued to fall and consequently lowering the Fund's net asset value. It is measured by credit sensitivity. In the event of default, the value of the securities may be zero.
- **Risks associated with the temporary purchase and sale of securities and the management of collateral:**

Transactions involving the temporary purchase and sale of securities may entail risks for the Fund, such as:

- counterparty risk: the risk of loss deriving from the fact that a counterparty in a transaction for the temporary purchase and sale of securities may fail to meet its obligations before the definitive settlement of the transaction.
- custody risk: the risk of loss of assets deposited due to insolvency, negligence or fraud on the part of the custodian.
- operational risks.
- legal risk: deriving from the potentially inappropriate wording of the contracts put in place with counterparties in transactions for the temporary acquisition and sale of securities.

The management of collateral may create risks for the Fund, such as:

- liquidity risk: the risk that a security taken as collateral may not be sufficiently liquid to be sold quickly in the event of the counterparty's defaulting.
- market/correlation risks: the risk that a security sold in the event of default by a counterparty produces a capital loss relative to the marked down value, entailing a loss for the Fund. The correlation between downward market movements and the default of a banking counterparty may accentuate this phenomenon.

- **Risk linked to overexposure:** The Fund may use forward financial instruments (derivatives) to generate equity overexposure, where the Fund's exposure exceeds its net assets. Depending on the direction of the Fund's transactions, the impact of a fall (in the case of buying exposure) or rise (in the case of selling exposure) in the underlying asset may be amplified and therefore increase the fall in the Fund's net asset value.
- **Counterparty risk:** This is the risk of default by a counterparty, causing it to default on payment. The Fund's net asset value could fall in the event of counterparty default.
- **Emerging market risk:** The Fund may be exposed to emerging markets. Emerging markets are stock markets in which liquidity and security do not always correspond to the usual standards of the major international markets. In addition, these countries have a high risk of expropriation, nationalisation and social, political and economic instability.
- **Currency risk:** Currency risk exists due to the fact that the Fund holds securities or UCITS denominated in a currency other than the euro. Any movement in the euro against another currency could have a negative impact on the Fund's net asset value. Shares denominated in CHF and USD are hedged, therefore the currency risk is residual. However, it is important to note the residual currency risk that could result from an imperfect hedge. This risk could lead to a fall in net asset value.

Recommended minimum investment period

The recommended minimum investment period is three years.

Asset allocation

Net income: Accumulation.

Net capital gains realised: Accumulation.

Charges and fees

Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. The fees charged by the Fund serve to offset the costs incurred by the Fund to invest or divest the assets under management. Fees that are not payable to the Fund are paid on to the management company, marketing agent, etc.

Fees charged to the investor on subscriptions and redemptions	Basis	Rate
Subscription fee payable to third parties	NAV x number of shares	Maximum 3%
Subscription fee payable to the UCITS	NAV x number of shares	Not applicable
Redemption fee payable to third parties	NAV x number of shares	Not applicable
Redemption fee payable to the UCITS	NAV x number of shares	Not applicable

Other fees charged to the UCITS

Other fees charged to the UCITS	Basis	Rate
1 Management and administrative fees external to the Management Company	Net assets excluding Group UCITS	0.75% incl. tax Maximum rate
2 Turnover fees	Deducted for each transaction	Max: EUR 150 excl. tax
3 Performance fee	Not applicable	Not applicable

Additional information on temporary purchases and sales of securities

In the context of securities lending and repurchase transactions, SCOR Investment Partners SE performs the following services on behalf of the UCITS:

- selection of counterparties,
- requesting the putting in place of market contracts,
- checking and monitoring counterparty risk,
- qualitative and quantitative monitoring of collateralisation (controls on diversification, ratings, liquidity), repo transactions and securities lending.

Income deriving from these transactions is refunded to the UCITS.

Any costs are borne by the Management Company.

Aggregate risk calculation method

Aggregate risk is calculated using the commitment method.

ECONOMIC ENVIRONMENT AND INVESTMENT POLICY

Economic environment

This past year was characterised by a collapse in market expectations and trends in financial asset prices in the last quarter. During the first part of the year the economic cycle remained benign, with corporate earnings up strongly (by 20% in the US) accompanied by a gradual exit from accommodative monetary policies against a backdrop of well-controlled inflation. In this context, financial asset volatility was low, with equity indices posting positive performances, interest rates rising gradually in the US and credit spreads practically unchanged. The US Federal Reserve, pointing in particular to the very low level of unemployment (3.8%) and the rising trend in endogenous inflation, gradually raised its key interest rates from 1.5% to 2.5%, while at the same time embarking on its balance sheet reduction programme. The European Central Bank left its rates unchanged at -0.4% but resolutely started to cut back on its asset purchasing programme.

However, in the last quarter of the year, growing political and trade uncertainties led to a downward revision of economic prospects, which now made monetary policies look not accommodative enough.

The correction was therefore relatively sharp, with a fall of nearly 20% in equities and a flight to risk-free assets such as government securities.

Over the course of the year, ten-year rates in the US went from 2.53% to 3.23% before ending the year at 2.68%. In Europe, rates fell throughout the year, reaching 0.24% for the ten-year German bond as against 0.47% at the beginning of the year. The interest rate differential between the two zones thus remains historically very high, reflecting the still very different growth dynamics. Thus the euro continued to depreciate against the US dollar, with the exchange rate going from 1.20 to 1.15 while the annualised cost of hedging the dollar against the euro went from 2.3% to 3.1%.

In this environment, the main equity indices posted negative performances for the year with, dividends included, -4.4% for the S&P 500, -10.7% for the Stoxx 600 European and -10.4% for Japan's Nikkei.

In correlation with these movements, the credit markets suffered from widening spreads across the board, with yield spreads of global non-speculative indices against government securities going from 0.97% to 1.58% while for the speculative category the spread went from 3.49% to 5.40%.

Investment policy

The SCOR CONVERTIBLE EUROPE Fund began the year with an equity sensitivity in line with that of its benchmark. Our management policy focuses on managing the Fund's equity sensitivity. Based on our macroeconomic forecasts, we increase or reduce our equity sensitivity without exceeding the benchmark by more than 20%. It was later reduced as a result of the sharp decline in the equity markets towards the end of the year.

In contrast, we diverged from the benchmark as regards our sector exposure. The telecommunications, utilities and real estate sectors were under-represented in our portfolio while healthcare and oil were over-represented.

Assets under management declined slightly over the year as a result of the fall in the markets, to around €185 million.

We remain cautious at this year-end in view of the uncertainties that continue to weigh on markets, keeping 9% of assets in cash and holding equity sensitivity slightly below that of the benchmark.

Performance

SCOR CONVERTIBLE EUROPE was launched on 27 December 2012. The Fund's performance since its launch date has been 20.21% (EUR C Share). Over the same period, the performance of the benchmark, Exane Convertible Europe, was +20.31%.

The performance of SCOR CONVERTIBLE EUROPE in 2018 was -5.03% (EUR C Share). Over the same period, the performance of the benchmark, Exane Convertible Europe, was -4.89%.

Past performance is not a reliable indicator of future performance.

ADDITIONAL INFORMATION

Efficient portfolio management techniques

Exposure obtained through efficient portfolio management techniques

As at 31 December 2018: none.

The Fund did not carry out any transactions relating to efficient portfolio management techniques during the year.

Identity of the counterparty or counterparties to these efficient portfolio management techniques

As at 31 December 2018: none.

Type and amount of financial guarantees received by the UCITS to reduce counterparty risk

As at 31 December 2018: none.

Income from efficient portfolio management techniques for the entire period, and direct and indirect operating costs and expenses incurred

Income deriving from these transactions is refunded to the UCITS.

Income: EUR 0.00

Direct and indirect operating costs and expenses incurred: EUR 0.00

Derivative financial instruments

Underlying exposure achieved through derivative instruments

As at 31 December 2018: none.

Identity of the counterparty or counterparties to these derivative financial transactions

As at 31 December 2018: none.

Type and amount of financial guarantees received by the UCITS to reduce counterparty risk

As at 31 December 2018: none.

Management of financial guarantees relating to OTC derivative transactions and efficient portfolio management techniques

Guarantee received from an issuer exceeding 20% of the net asset value of the UCITS

As at 31 December 2018: none.

UCITS fully guaranteed by securities issued or underwritten by a Member State

No.

Information on securities financing transactions and total return swaps (SFTR)

Global data

The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents

Not applicable.

The amount of assets engaged in each type of securities financing transaction and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management

Not applicable.

Concentration data

Ten largest collateral issuers across all securities financing transactions and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

Not applicable.

Top 10 counterparties of each type of securities financing transaction and total return swaps separately (name of counterparty and gross volume of outstanding transactions)

Not applicable.

Aggregate transaction data for each type of securities financing transaction and total return swaps separately to be broken down according to the below categories

- Type and quality of collateral:
Not applicable.
- Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions:
Not applicable.
- Currency of the collateral:
Not applicable.
- Maturity tenor of the securities financing transactions and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions:
Not applicable.
- Country in which the counterparties are established:
Not applicable.
- Settlement and clearing:
Not applicable.

Data on reuse of collateral:

- Share of collateral received that is reused, compared to the maximum amount specified in the prospectus or in the disclosure to investors:
Not applicable.

- Cash collateral reinvestment returns to the collective investment undertaking:

Not applicable.

Safekeeping of collateral received by the collective investment undertaking as part of securities financing transactions and total return swaps (number and names of depositories and the amount of collateral assets safe-kept by each of the depositories)

Not applicable.

Safekeeping of collateral granted by the collective investment undertaking as part of securities financing transactions and total return swaps (the proportion of collateral held in segregated accounts or in pooled accounts, or in any other accounts)

Not applicable.

Data on return and cost for each type of securities financing transaction and total return swaps broken down between the collective investment undertaking, the manager of the collective investment undertaking and third parties in absolute terms and as a percentage of overall returns generated by that type of securities financing transaction and total return swaps

Not applicable.

ACTIVITIES OF THE UCITS DURING THE FINANCIAL YEAR

The following points were updated in the prospectus on 29 January 2018:

- AMF classification eliminated,
- Reference to the discretionary management of the portfolio added,
- Regulatory reference to the benchmark added,
- Reference to the accounting plan in the accounting rules and methods updated.

OTHER REGULATORY INFORMATION

Selection policy, evaluation and monitoring of intermediaries and counterparties

Introduction

As part of its collective investment scheme and discretionary management activity, SCOR Investments Partners ensures best execution by choosing intermediaries and counterparties based on objective criteria.

Since SCOR Investment Partners is not a member of a regulated market or multilateral trading facility (MTF), it transmits orders to intermediaries and counterparties for execution without knowing the final execution venue actually chosen.

These intermediaries and counterparties can choose to execute orders on regulated markets, multilateral trading platforms, with systematic internalisers or for their own account.

The intermediaries and counterparties selected by SCOR Investment Partners are bound by their regulatory obligations to guarantee the Management Company best execution.

The following policy describes the selection and evaluation methods for intermediaries and counterparties, as well as the monitoring procedures.

Order allocation and distribution principles

SCOR Investment Partners ensures that orders executed on behalf of its clients are recorded and allocated swiftly and accurately. Orders are transmitted and executed in order of arrival, except where this is impossible due to the nature of the order or market conditions, or when the interests of clients dictate otherwise.

SCOR Investment Partners takes all reasonable measures to ensure that all financial instruments are quickly and correctly assigned to the account of the client concerned.

SCOR Investment Partners a priori defines the allocation of the orders it issues. As soon as it receives confirmation of execution, it forwards the precise and final allocation of beneficiaries to the depositary/custodian.

Grouped orders

Unless otherwise instructed by the client, orders relating to several portfolios may be grouped for best execution, particularly in terms of cost, taking care to ensure equal treatment. Grouping orders in this way can sometimes lead to partial execution of the client's order(s).

Documented processes describe the procedures for a priori order allocation, as well as how to react in particular situations, such as a partial response to the orders transmitted. These procedures take into account the interests and particular circumstances of each client, so as to ensure swift execution and equal treatment of all clients.

Instructions received from the client

If instructions are received from the client concerning the organisation or choice of intermediary or counterparty, or a particular aspect of the order, SCOR Investment Partners will not be bound by the best execution obligation when executing the order.

SCOR Investment Partners will follow the client's specific instructions in this case, even if those instructions are at odds with this policy. However, SCOR Investment Partners reserves the right to uphold its execution policy when a client's specific instructions are unclear.

Role and functioning of the Intermediary and Counterparty Selection and Monitoring Committee

The purpose of SCOR Investment Partners' Intermediary and Counterparty Selection and Monitoring Committee is:

- to draw up the list of intermediaries and counterparties,
- to establish objective criteria for evaluating intermediaries and counterparties,

- to monitor changes in volumes allocated to each intermediary and counterparty (including dynamic analysis of brokerage fees for equities and net amounts for other products), on aggregate and by product,
- to judge the quality of order execution of intermediaries and counterparties according to the objective criteria previously established.

The permanent members of the Selection Committee are as follows:

- the Chief Executive Officer,
- the Chief Investment Officer,
- the Chief Operating Officer,
- Desk Managers,
- the Chief Risk Officer,
- the Chief Compliance and Internal Control Officer.

The Committee is chaired by the Chief Investment Officer.

The intermediaries and counterparties selected for execution must have been unanimously approved by all members of this Committee.

The Intermediary and Counterparty Selection and Monitoring Committee meets at least twice a year to review all intermediaries and counterparties. It also meets at other times if requested by one of the permanent members.

In a bid to maintain operational efficiency and in the exclusive interests of its investors and principals, SCOR Investment Partners will endeavour to limit, within reason, the number of intermediaries and counterparties by selecting them based on quality-of-service criteria.

Similarly, SCOR Investment Partners will endeavour to maintain a minimum number of intermediaries and counterparties to ensure effective competition between different service providers.

Selection process for intermediaries and counterparties

Each intermediary and counterparty that SCOR Investment Partners deals with for the execution of one or more transactions on behalf of its clients or collective investment schemes is accredited (approved) by a special committee. This accreditation takes into account the management process and the characteristics of the financial instruments in which fund managers invest.

The accreditation process consists of:

- analysis of the quality of the counterparty/intermediary with regard to the management style implemented by SCOR Investment Partners,
- risk analysis (counterparty risk).

Fund managers can nominate intermediaries and counterparties to the Intermediary and Counterparty Selection and Monitoring Committee according to their needs or service proposals received from service providers.

The Desk Manager is in charge of analysing and compiling the dossier for the Committee, including an analysis of any potential conflict of interest with the recommended service provider.

The proposal is then examined by the Committee.

The selection criteria take into account the nature of the financial instruments concerned and the management process.

Evaluation process for intermediaries and counterparties

Intermediaries and counterparties are evaluated as part of a twin process:

- in the context of ongoing dealings with service providers,
- and within the Committee.

In the normal course of business:

- evaluation of intermediaries and counterparties by Front Office,

- monthly monitoring of trading volumes by Portfolio Administration,
- counterparty risk analysis,
- periodic review by the Chief Compliance and Internal Control Officer.

The list of intermediaries and counterparties that the company deals with is reviewed by the Committee at least once every six months, based on the list of accredited intermediaries and counterparties and according to the following procedure:

- every six months, a comprehensive questionnaire covering all intermediaries and counterparties is sent to Committee members, who submit a score and evaluation for areas that concern them.
- the score specifically includes the following criteria, if they are relevant to the chosen investment process: quality of research, quality of execution, intermediation costs, quality of transaction processing, etc.

Decision to supervise or delist intermediaries/counterparties

The Committee may decide to delist intermediaries/counterparties.

If they receive information about a counterparty or intermediary requiring suspension or supervision, Committee members may seek the Committee's opinion on whether to suspend or curtail authorisation.

The Chief Compliance and Internal Control Officer is responsible for updating the list of accredited intermediaries and counterparties and for circulating this.

Voting policy

In accordance with Articles 314-100 and 319-21 of the General Regulation of the French Financial Markets Authority (*Autorité des Marchés Financiers* – AMF), SCOR Investment Partners has a voting policy which sets out the conditions under which it exercises voting rights attached to the securities held by the UCIs it manages.

Exercising voting rights at shareholders' meetings is the responsibility of fund managers, who analyse meeting resolutions. Fund managers may follow the recommendations of the French Asset Management Association (*Association Française de la Gestion Financière* – AFG). Fund managers always vote in favour of the smooth operation and good governance of the business, as well as in the interests of investors. In operational terms, voting rights are exercised by the Middle Office, which is responsible for forwarding the voting decisions of fund managers. In principle voting is done by post. However, fund managers may occasionally attend shareholders' meetings.

Voting rights are systematically exercised when the collective investment scheme holds more than 1% of the company's capital.

The principles of SCOR Investment Partners' voting policy are based on good governance, in accordance with the interests of investors.

SCOR Investment Partners pays particular attention to resolutions on the following subjects:

- decisions involving an amendment to the articles of association,
- approval of the financial statements and allocation of profit,
- appointment and dismissal of governing bodies,
- "regulated" agreements,
- equity issuance and redemption plans,
- appointment of statutory auditors,
- environmental resolutions.

Voting rights are exercised in the sole interests of investors, regardless of SCOR Investment Partners' own interests, and in compliance with the principles set out in this policy. SCOR Investment Partners has put in place a framework, procedures and monitoring system to prevent any potential or actual conflict of interest.

In accordance with Articles 314-101 and 319-22 of the AMF General Regulation, the conditions in which we exercised voting rights in 2018 are set out below.

In accordance with the management company voting policy, we hereby inform you that no voting rights were exercised in 2018, the 1% threshold not having been reached on any of the positions held in the portfolio.

Number of companies in which the portfolio management company exercised its voting rights as a proportion of the total number of companies in which it held voting rights

Not applicable.

Cases in which the portfolio management company considered itself unable to comply with the principles set out in its “voting policy” document

Not applicable.

Conflicts of interest that the portfolio management company had to consider when exercising voting rights attached to the securities held by the collective investment schemes it manages

Not applicable.

Turnover fees

SCOR Investment Partners does not receive turnover fees.

Intermediation fees

Since the amount of intermediation fees is lower than the minimum provided by the General Regulation of the French Financial Markets Authority, SCOR Investment Partners is exempt from preparing a report on intermediation fees for 2018.

Procedures for taking ESG criteria into account in the investment policy

SCOR Investment Partners is committed to applying ESG criteria in its investment policy.

As such, the management company abides by government blacklists (e.g. FATF, Ministry of the Economy, Norwegian Pension Fund, etc.). Its approach is based on major international conventions.

In real estate, SCOR Investment Partners is gradually incorporating HQE, Leed and Breeam certification into its investments and when carrying out building renovations.

These rules are applied to all investments under discretionary or collective management.

Information on investments in Group securities and collective investment schemes

We can confirm that at year-end:

- securities issued by the management company or its affiliates represented 0% of the UCITS' net assets;
- collective investment schemes or investment funds managed by the management company or its affiliates represented 0% of the UCITS' net assets;

Remuneration policy

SCOR Investment Partners' remuneration policy fully reflects the SCOR group's remuneration policy, which is based on its corporate values. It allows these corporate values to be implemented and the manner in which they are applied in day-to-day activities to be defined.

Aligned with the main guidelines of the SCOR group's policy, SCOR Investment Partners' remuneration policy is global, and notably promotes sound and efficient risk management. In this regard, it does not encourage risk-taking that would be incompatible with the risk profiles and documents constituting the mandates and funds managed by the management company.

SCOR Investment Partners' remuneration policy is based on objective criteria of competence, experience and seniority within the company, and on fair and measured assessment of attainment of individual and collective goals, including its employees' conduct in pursuing these objectives.

Remuneration has a number of dimensions:

- a fixed portion and a variable component;
- a portion paid immediately and a portion that is deferred;

- an individual part and a collective part.

These elements comprise the base gross salary (fixed remuneration), as well as, potentially, an annual cash bonus, a profit sharing scheme, free SCOR SE shares and SCOR SE stock options.

The information on the compensation policy is referred to in the Management Company's Annual Report. The Management Company's Annual Report is available on request by the shareholders from the Management Company.

Details of the current remuneration policy, including in particular a description of the manner in which the compensation and benefits are calculated, the identity of the people responsible for the allocation of remuneration and benefits, including the members of the Remuneration Committee, are available on the website of the management company (www.scor-ip.com). A paper version of the remuneration policy will be made available free of charge upon request to the management company.

SCOR Investment Partners' remuneration policy is reviewed annually by the Management Board of SCOR Investment Partners. On 28 January 2019, the Board approved the policy applicable to 2018 and its compliance with the principles of the AIFM Directive and UCITS 5.

The implementation of SCOR Investment Partners' remuneration policy is the subject of an annual internal, central, independent evaluation carried out by the Risk, Compliance and Internal Control department of SCOR Investment Partners.

Notwithstanding the total or partial meeting of the performance conditions, vesting of all or part of the shares is subject to a condition of continued presence in the group as well as in any case on the one hand total compliance with the Group's ethical principles as set out in the SCOR Group's Code of Conduct and SCOR Investment Partners' Code of Ethics and on the other hand, for options, undergoing mandatory training on environmental and social responsibility (ESR).

Total number of employees at 31 December 2018 (*)	69
Fixed remuneration 2018 (*)	€7,113,996
Variable remuneration paid in 2018 (*)	€4,212,311
of which deferred variable remuneration	€3,045,278
of which non-deferred variable remuneration	€1,167,033
Total remuneration 2018 (*)	€11,326,308

STATUTORY AUDITOR'S REPORT

SCOR CONVERTIBLE EUROPE

French Mutual Fund – Fonds Commun de Placement (FCP)

Management company:

SCOR Investment Partners SE

5, Avenue Kléber
75016 Paris

Statutory Auditor's Report on the annual financial statements

Year ended 31 December 2018

To the unitholders of FCP SCOR CONVERTIBLE EUROPE,

Opinion

In performance of the assignment entrusted to us by the Management Company, we have audited the financial statements of the SCOR CONVERTIBLE EUROPE collective investment fund (Fonds Commun de Placement - FCP) for the year ended 31 December 2018 as enclosed herewith.

We certify that the financial statements, in accordance with French accounting rules and principles, give a true and fair view of the results of the Fund's operations during the past financial year and its assets and financial position at the end of the year.

Basis of our opinion on the annual financial statements

Audit referential

We conducted our audit in accordance with professional auditing standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

The responsibilities incumbent upon us by virtue of these standards are indicated in the section headed "Responsibilities of the Statutory Auditor in respect of the audit of the financial statements" in this report.

Independence

We conducted our audit engagement in compliance with the independence rules applicable to us, for the period from 30 December 2017 to the date of our report and in particular we did not provide any services prohibited by Code of Ethics for Statutory Auditors.

Justification of our assessments

Pursuant to the provisions of Articles L.823-9 and R.823-7 of the French Commercial Code relating to the justification of our assessments, we inform you that the assessments we made in accordance with our professional judgement focused on the appropriateness of the accounting principles applied, the reasonableness of the significant estimates used and the presentation of the financial statements as a whole in accordance with the accounting chart for open-ended collective investment schemes, particularly as regards the financial instruments in portfolio.

The assessments were made in the context of our audit of the financial statements taken as a whole and the forming of our opinion expressed above. We do not express an opinion on the elements of these financial statements taken in isolation.

Verification of the Management Report drawn up by the Management Company

We have also performed the specific verifications required by law in accordance with the professional standards applicable in France.

We have no observations to make regarding the fair presentation and consistency with the annual financial statements of the information given in the Management Company's Management Report.

Responsibilities of the Management Company regarding the financial statements

The Management Company is responsible for the preparation of the financial statements giving a true and fair view in accordance with French accounting standards and for putting in place such internal controls as it deems necessary to enable the preparation of financial statements that are free of material misstatement, whether due to fraud or error.

In drawing up the financial statements, it is incumbent upon the Management Company to assess the Fund's ability to continue as a going concern, to provide such information relating to the going concern assumption as may be necessary or appropriate and to apply the going concern accounting principle unless it intends to put the Fund into liquidation or cease its activities.

The annual financial statements were prepared by the Management Company.

Responsibilities of the Statutory Auditor in respect of the audit of the financial statements

It is for us to draw up a report on the financial statements. Our objective is to obtain reasonable assurance that the financial statements taken as a whole do not contain material misstatements. Reasonable assurance means a high level of assurance, which does not however guarantee that an audit performed in accordance with the standards of the profession will always detect every material misstatement. Misstatements may derive from fraud or from error and are considered material if, taken individually or together, they can reasonably be expected to be capable of influencing such economic decisions as users of the financial statements may take on the basis of those statements.

As specified by Article L.823-10-1 of the French Commercial Code, our certifying the financial statements does not imply assurance of the viability of your Fund or of the quality of its management.

Throughout the audit process carried out in accordance with professional standards applicable in France the Statutory Auditor exercises its professional judgement. Furthermore:

- it identifies and assesses the risks of material misstatements being contained in the financial statements whether deriving from fraud or from error, defines and implements audit procedures to address these risks and collects such evidence as it considers sufficient and appropriate on which to base its opinion. The risk of non-detection of a material misstatement arising from fraud is higher than that of such misstatement arising from error, since fraud may involve collusion, forgery, wilful omissions, false declarations or bypassing of internal controls;
- it takes note of such internal controls as are pertinent for the audit in order to define the appropriate audit procedures in each situation, but not with a view to expressing an opinion on the effectiveness of the internal controls;

4 | SCOR CONVERTIBLE EUROPE | Statutory Auditor's Report on the financial statements for the year ended 31 December 2018

- it assesses the appropriateness of the accounting methods applied and the reasonableness of the accounting estimates made by Management Company, as well as the related information provided in the financial statements;
- it assesses the appropriateness of the Management Company's application of the going concern accounting principle and, depending on the evidence collected, the existence or otherwise of significant uncertainty associated with events or situations likely to cast serious doubt on the Fund's ability to stay in business. This assessment is based on the evidence collected up until the date of the audit report. However, future situations or events could call into question the Fund's continued operation. If it reaches the conclusion that such significant uncertainty does exist, it draws the attention of readers of the audit report to the information provided in the financial statements regarding this uncertainty or, if this information is insufficient or inappropriate, it issues a qualified opinion or refuses to certify;
- it assesses the overall presentation, structure and content of the financial statements and whether they give a true and fair view of the underlying transactions and events.

Paris La Défense, 1 April 2019

Statutory Auditor

ACCOUNTING RULES AND METHODS

Asset valuation and recognition rules

The undertaking complies with ANC Regulation 2014-01 of 14 January 2014 relating to accounting standards applicable to open-end collective investment undertakings.

The accounting currency is the euro.

The portfolio is valued on each net asset valuation date and when the financial statements are prepared, based on the following methods:

Asset valuation rules

- Equities:

Equities are valued based on closing prices.

- Bonds:

Bonds are valued based on closing prices.

Accrued interest is valued at $D+X$, where X is the settlement/delivery period of the market in which the financial instrument is traded.

- Negotiable debt securities:

Treasury bills are valued based on the average price reported voluntarily by market makers.

Other negotiable debt securities (certificates of deposit, commercial paper, bank bonds, etc.) are valued based on closing prices.

In the absence of an indisputable market price, they are valued based on the yield curve by applying a reference yield, adjusted for any margin calculated according to the characteristics of the issuer.

- UCITS:

Shares or units of UCITS are valued at the last published net asset value.

- Temporary purchases and sales of securities:

Securities received under repurchase agreements or borrowed securities are recorded as securities purchased under the heading "Receivables on securities received under repurchase agreements or borrowed securities" at the contract amount, plus any accrued interest receivable.

Securities transferred under a repurchase agreement or securities loaned are recorded in the portfolio at their present value. The payables on securities transferred under a repurchase agreement and securities loaned are recorded as securities sold at the value determined in the contract, plus any accrued interest.

Financial guarantees received for securities lending transactions are valued at each net asset valuation date. Assets with significant price volatility may be discounted.

- Futures and options markets:

Firm and conditional contracts on organised futures markets are valued at the settlement price.

- OTC transactions:

Foreign exchange forward transactions are valued at the Bloomberg price at 17:30, taking into account the swap point. The swap point is calculated based on the forward rate on the day of calculation of net asset value.

Valuation rules for off-balance-sheet commitments

Futures contracts are carried at their market value as off-balance-sheet commitments at the price used in the portfolio.

Conditional forward transactions are translated into the underlying equivalent.

Commitments on exchange contracts are presented at nominal value, or in the absence of the nominal value, for an equivalent amount.

Accounting policies

Accounting is done excluding fees.

Income is recognised according to the commitment method.

Weighted average cost is used as the securities settlement method. Conversely, the FIFO (First In, First Out) method is used for derivatives.

Fixed operating and management fees

A charge is calculated for each calculation of net asset value based on 0.50% incl. tax of the net assets excluding UCITS of the Group. These fees, which do not include transaction fees, are posted directly to the income statement of the UCITS.

Performance fee

Not applicable.

Management fees paid on

Not applicable.

Allocation of distributable amounts

Net income: Accumulation.

Net capital gains realised: Accumulation.

The net profit at 31 December 2018 is accumulated.

Net capital gains at 31 December 2018 are accumulated.

Other information

Accounting changes to be disclosed to investors

Not applicable.

Changes in estimate and implementing procedures

Not applicable.

Corrections of errors or omissions

Not applicable.

CHANGES IN NET ASSETS
